Summary

Backend engineer with 6 years of experience building serverless APIs on AWS.

Experience

Senior Software Engineer, Finlytics Jan 2022 - Present

Designed REST APIs in Python and FastAPI on AWS Lambda and API Gateway serving 2M requests a day. Modelled data in DynamoDB and PostgreSQL. Wrote all infrastructure in Terraform and shipped through GitHub Actions CI/CD. Cut p95 latency by 40% with Redis caching.

Software Engineer, CloudKart Jul 2019 - Dec 2021

Built order-processing microservices in Python and Django, packaged with Docker and deployed to Amazon EKS (Kubernetes). Owned the SQL reporting layer and SQS-based async workflows.

Skills

Python, FastAPI, Django, AWS (Lambda, S3, DynamoDB, SQS, API Gateway), Terraform, Docker, Kubernetes, PostgreSQL, Redis, REST APIs, GitHub Actions, Linux

Education

B.Tech, Computer Science, NIT Trichy 2015 - 2019
